ALLOWANCE

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(c), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(c) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 18, 2010 has been entered.
2. The drawings have been accepted.

Information Disclosure Statement

3. An initialed Form PTO-1449 for the March 18, 2010 IDS is included with this Notice of Allowance.
4. The documents filed in the IDS filed March 18, 2010 have been considered: the application is deemed allowable after consideration of these documents.

Allowable Subject Matter

5. Claims 27-29, 31-40, 58-63, 98-133 and 135-216 are allowed.

Reasons for Allowance

6. The following is an examiner's statement of reasons for allowance:

In regard to independent claim 27, the prior art of record fails to teach or suggest: a colored transparent article comprising a thermoplastic polymer matrix as recited, a plurality of

domains and one or more light absorbing compositions, wherein the domains each encompass at least one incompatible filler, and the dimensions of at least some of the domains in the axial plane of the article fall within a range of from about 400 nm to about 700 nm, where the measured haze of the article in the absence of the one or more light absorbing compositions is at least 4%, but where the one or more light absorbing compositions is present in an effective amount to alter the light absorption of the colored transparent article, the total amount of relative light available for reflectance according to the recited equation is less than 9.6.

The closest prior art, Kim et al (USPN 5,314,987), disclose an article comprising an incompatible filler and thermoplastic polymer matrix that would inherently provide domains of some dimension and that the article possesses some color, but there is no evidence that the dimensions of the domains are within the claimed range, or that without the addition of one or more light absorbing compositions the article would have a haze of at least 4%. The intent of Kim et al is to use specific catalysts to prevent the domains from reaching dimensions in the visible light range of 400 to 700 nm, and as shown by the Declaration #2 of Dr. Kevin L. Rollick, the article of Kim et al would not inherently or obviously meet the claimed combination of limitations because merely blending nylon and polyester would not necessarily lead to those dimensions. Kim et al actually intend to eliminate the visible light-dimensioned domains, not to render them moot by adding light absorbing materials as claimed in this application.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Walter B. Aughenbaugh whose telephone number is (571) 272-1488. The examiner can normally be reached on Monday-Thursday from 9:00am to 7:30pm.
